What is Detox Therapy?

Detox Therapy is a powerful new way to experience cellular detoxification. Detoxifying the body regularly is essential to maintaining good health and to avoid disease. Every day we ingest a vast array of pesticides, herbicides, colorings, additives, preservatives, and chemicals through our water, air and food. These toxins and chemicals get stored in the body's joints, organs, arteries, nerves and tissues, disrupting their function and creating an environment for disease, allergies and immune system breakdowns. The Detox for Life Therapy foot spa system provides a thorough and efficient way to cleanse the body of these wastes. The patented Detox for Life Therapy system ionizes the blood stream alternatively charging it both positively and negatively to act as little magnets which attach themselves to all manner of oppositely charged toxic particles. These toxins are then drawn out of the body through the pores of your feet to cleanse and detoxify the whole body.

In combination with a healthy lifestyle, Detox for Life Therapy can help you to maintain high energy levels and long-term wellness but it is not for everyone. PEOPLE WHO SHOULD NOT take the Detox for Life Therapy session include:

- Women who are pregnant or nursing should not take a therapy treatment as it may cleanse your body of needed nutrients;
- If you wear a Pacemaker, take Heart regulating medicines or have a weak Heart;
- If you are a recent Organ transplant recipient taking medication to prevent rejection;
- If you have open wounds on your feet;
- People taking any medication which, if purged would incapacitate them mentally or physically should retake their meds after therapy. Usually, all medication is absorbed within 3 hours and no harm will result from Therapy after this time.

Please, if you have any of the health challenges we mention above, consult your primary health care provider if you have any questions on whether you should use this product.

What to Expect From Detox Therapy?

Most people should immediately experience an increased sense of well-being and more energy. Many have reported greater mental clarity; individuals can expect to feel a greater sense of well being from each Detox for Life Therapy foot spa session. Many people with headache pain, Menstrual cramping, edema, gout and swollen or deteriorating joints due to arthritis report considerable symptomatic relief from as little as one Detox for Life Therapy session.

Detoxifying the body regularly is essential to maintaining good health and to avoid disease. Every day we ingest a vast array of pesticides, herbicides, colorings, additives, preservatives, and chemicals through our water, air and food. The Detox for Life Therapy foot spa system provides a thorough and efficient way to cleanse the body of these wastes. The result is increased metabolic function of each excretory organ increasing vitality, promoting healing and alleviating chronic pain. Each person experiences a different reaction to the Detox for Life Therapy system. The color and the makeup of the toxins expelled reflect the concentration of pollutants in your body.

While everyone knows we ingest and store heavy metals, pollutants and all manner of industrial waste, it has been impossible to purge them from our bodies until the invention of the professional Detox for Life Therapy system. Chinese medicine refers to the complex energy fields that realign the body's energy while improving oxygen levels as the "Chi". The Detox for Life Therapy System generates a stream of positive and negative ions which attract and attach themselves to oppositely charged toxic particles throughout the body creating a harmony with the Chi while purging the body of toxins such as chemicals, pollution, synthetics, and other foreign material that block the body's elimination system. This internal cleansing is believed by many to clean the liver and kidneys resulting in less body fluid retention, reduced inflammation, improved memory, greater bladder control, a stronger immune system and significant pain relief from chronic headaches, menstrual cramping, arthritis and other pains.
