

ARRAY CARE

As a Detox for Life Therapy partner we maintain the equipment, you are responsible for supplies. Arrays, the small tube that goes into the water is the largest supply expense salons and spas have so we want you to know how to stretch that supply dollar.

Perhaps the single greatest challenge our new users encounter is “CURRENT ERRORS” when they turn on the system. These errors NEVER mean the machine is broken, they ALWAYS stem from either the wrist strap (rarely) or the ARRAY being no good! To avoid this problem and enhance your ARRAY LIFE, please read this page carefully before doing your first therapy treatment.

The Detox for Life Therapy system creates a low-grade electrical charge (not dangerous) within your blood stream running from the wrist strap down to the bottoms of your feet, into the water and out to the array in the water. The current then MUST return to the machine through the array to complete the circuit. “CURRENT ERRORS” happen when the ionizing effect set up by the system is interrupted, mostly by the array becoming corroded and not conducting properly. To prevent this from happening, the array must be kept clean and not allowed to rust or corrode by doing the following:

1. When you finish with a treatment, clean the array thoroughly with undiluted all purpose cleaner and rinse under tap until the cleaning solution is gone then;
2. If you have another appointment today, leave array soak in an undiluted cleaning solution such as Simple Green®. This will keep it from corroding in the air;
3. When you are preparing for another therapy treatment, take the array from the cleaning solution and rinse it under tap until the water runs clear;
4. Place the array in the pan of water, plug the array into the Detox for Life machine and conduct the therapy treatment;
5. When your therapy treatment is finished, run under tap and place the array back in the cleaning solution until you need it again;
6. At end of day, take array from the cleaning solution and rinse it under tap until the water runs clear. Next, dry THE INSIDE components well by blow-drying them for a few moments and then place the array in a re-sealable baggie for storage.

If you follow this simple process you will maximize the life of your array and see 20-30 therapy treatments from it. If you do not, it may only last for 1. Arrays are a consumable, and are NOT WARRANTEED so the better you care for them the less your after market costs will be.

NOTE: As an array often becomes ineffective long before it stops working to peak efficiency we recommend you purchase a new array each time you recharge your therapy sessions.

Normally, a single array is \$74.95 + S&H but we offer our partners a **special price of \$40.00 each** when ordered with therapy recharges;

SPECIAL DISCOUNT pricing of **\$30.00 each** if 6 or more ordered at same time.

Model CT-801 MANUAL

This Quick Start Manual will guide you through the initial set up and operation of the Detox for Life Therapy System. Please read this short tutorial carefully before beginning your initial Detox therapy session.

WARNING: DO NOT USE THIS EQUIPMENT IF YOU HAVE A PACEMAKER OR ANY OTHER ELECTRICAL IMPLANT IN YOUR BODY AS THE IONIZING EFFECT OF THE EQUIPMENT MAY INTERRUPT THE OUTPUT.

GETTING STARTED

1. Remove the Detox for Life Therapy machine from the suitcase and place it on a stable platform like a table or the floor next to the chair you will sit on to receive your therapy treatment;

2. Swing down the **Stand** located on the bottom of the machine by gently pulling the hinge on both sides out a bit (*be careful not to break them by pulling to hard*) until they swivel freely. Then turn the stand downward to lock in place. This allows ease of use and ventilation for the unit;

3. Plug the **Power Cord** into the 3 prong outlet on back of the machine and plug the 2 prong side the into a standard electrical outlet (*the Detox for Life® System is UL approved and there is no need to be concerned about being shocked in any way*);

4. Place a plastic pan (NOT INCLUDED-*we use a 12-14 qt. hand washing pan from Walmart housewares dept.*) **lined** with a plastic trash liner (*Hefty® liners recommended*) and filled 1/2 way with plain tap water (*warm water may prove more comfortable*) on the floor in front of your chair;

 5. Now plug the **Array** (*the black or white round device included with your system*) into the FRONT plug on the machine and place the other end (*the end with plastic holes*) into the water. Be sure the array is covered in water. You may lay it on it's side without problem so long as the entire array is covered;

6. Plug the **Wrist Strap** into the back of the machine (*there are 2 inserts in back. The wrist strap plugs into the plug furthest to the right as you look directly at it.*) Place the strap around your wrist with the metal portion on the inside of your wrist. Wet the wrist at the contact point of the metal and the wrist to insure that the wrist strap will conduct the ionizing current. Adjust the strap to a snug, comfortable fit.

[IMPORTANT: always wipe the wrist band dry after use to avoid corrosion. NOTE: some wrist straps come with an alligator clip on them. REMOVE THE CLIP as it is not needed before plugging in to machine.]

7. Next, wrap the Far Infrared **Waist Belt** around your waist and plug the cord into the remaining insert in rear of the machine. The controls for the waist belt are on the top of the machine and simply labeled “Low”, “Med” or “High”. Adjust them to your personal comfort and press “ENT” to activate.

8. FINALLY, place both feet in the water and turn on the machine by pressing the **Power switch** on the rear of the machine. It is important to do this last to avoid “**Current Errors**”.

When the screen on front of the Detox for Life Therapy machine first lights up it flashes the Serial number of the machine along with the number of therapy sessions remaining for 3 seconds, then reverts to the default operating screen. This is all very important information, but we will get to it later.

9. You should now see on the screen “**Enter time 10-30**” this is default setting and means machine is ready to use for a 30-minute standard therapy treatment. Time can be adjusted up or down by pressing the +/- buttons below the screen if desired. **It is recommended that you always use entire 30-minute default time to assure best result;**

10. Next setting is “**V3.0**” which means the machine is in default operating mode and nothing need be done. Other mode settings are used for programming and for other electrical systems around the world;

11. Press the “**ENT**” button to begin your treatment. Time will begin to count down from 30 minutes (or time you set) to “0” and then shut off. You will hear a little tone when treatment is finished;

12. IMPORTANT: Once started, the display will also show amperage (E) on the lower right of screen. The ideal reading is between 1.5 and 2.0 amps (“**E=2.0**”). If the E= less than 1.5, you must bring it up by adding a **BIT** of table salt. **DO NOT ADD SALT until after you turn on system and read the electrical resistance level! If you do, you risk the error “add water”.** If the Amperage reading is below 1.5, add **NO MORE THAN 2 GRAMS OF SALT** to the water and swish it around in the pan. The salt will increase the electrical flow of the ionic process. You will see the reading go up within a moment. If you are still below 1.5, add A BIT more salt until you reach the desired amperage level;

Operating notes: For best results, follow these guidelines:

- If you receive “**Current Error**” on the screen, turn off machine power, rub a small amount of water on the wrist to increase the contact and snug the wrist strap back up making sure the metal contact is snug to the inside of your wrist. **You must have both feet in water**, wrist strap on and the array in water or “Current Error” will occur. Once you have done all of the preceding, turn on the power switch again.
- Should you see “**add water**” appear on screen it means that you have too much salt in the water. You must turn off your machine, pour out the water, run a fresh pan of water and begin the process again.
- The **Far Infrared Heat belt** is optional. While the deep infrared heat has shown to enhance the removal of toxins, it is not required for detox therapy.
- If you take any prescription medication, re-take them after therapy to possibility of medication being flushed out with the toxins. Another alternative is to schedule detox therapy for just before taking scheduled medication;
- Manufacturer recommends you detox once weekly for 14 weeks, then monthly to maintain maximum cleansing and removal of toxins;
- DO NOT use more than once per day as the flushing of toxins from the body may cause light headedness to occur;

When using Detox for Life system you will see water change from clear to Brown to Red, Orange, and Green etc. This chart is a general guide to the location of toxins in the organs of your body.

Yellow-Green	■	Detoxifying from the kidney, bladder, urinary tract, female/prostate area.
Orange	■	Detoxifying from joints.
Brown	■	Detoxifying from liver, tobacco, cellular debris.
Black	■	Detoxifying from liver.
Dark Green	■	Detoxifying from gallbladder.
White Foam	☼	Lymphatic system.
White Particles	☼	Yeast
Black Flecks	☼	Heavy metals.
Red Flecks	☼	Blood clot material.

Each person is different in what and how much toxic build-up they have in the various organs and so the water will be different depending on environment, career locale etc.

RECHARGING YOUR DETOX FOR LIFE THERAPY SYSTEM

As a partner with Detox for Life Therapy, we supply your business with a \$1,300 retail system and maintain it so you do not need worry about repairs; we also supply you with training videos, brochures and signage to promote the detox therapy. In return, Detox for Life receives a small per-use royalty of \$5 to \$7 per therapy.

To allow you to make money before you pay money, your system comes pre-loaded with 20 treatments with an average retail value of \$40 per treatment or **\$800.00**. You only pay for them AFTER you have this \$800 in pocket. When the first 20 detox therapy sessions are used, your Detox for Life system will shut off and need to be recharged with more sessions to re-activate.

To recharge your system with 20 or more therapy treatments:

1. Press “ESC” button on front of machine. Write down **SN# AND CT#** displayed. You will need this information to recharge your machine;
2. Call Detox for Life Therapy at **808-591-8837 to get password**. Each Password will recharge for 20 Therapy treatments;
3. Write the password down carefully and repeat it back before hanging up phone;
4. Press “ENT” to go to Password mode and enter the password you were given. If you make a mistake, just turn off machine on back and restart. Press “ENT” again and enter the password you were given.
5. Once password is correctly entered press ESC to confirm the recharge time, the balance of therapy should be **PT= 20 + the number of therapy treatments you had left;**
6. Turn off power and restart machine.

NOTE: 20 therapy treatments are \$7 each or \$140.00. If you want to save money, we offer 40 therapy treatments at \$6.50 each, 60 therapy treatments at \$6.00 or 80 therapy treatments at \$5.00 each.

Therapy treatments are billed in arrears meaning you pay for them AFTER YOU SELL THEM. When you order the next 20 treatments, you will be asked to pay by either VISA, AMEX MC or direct debit to your checking account as you choose.
